DEAR SIRS:

RE: DOCKET No 98-4124-26 NOTICE 1

I HAVE A VERY STRONG DISLIKE FOR SATURNS & A FEW OTHER CARS WITH DRL'S. ON A BRIGHT DAY, SATURNS WILL PUT OUT ANNOYING GLARE AT A DISTANCE WHEN APPROACHING. ON OVERCAST DAYS, IF THEY ARE BEHIND, I'M FORCED TO USE MY DAY/NIGHT MIRROR ON THE NIGHT SETTING, THUS REDUCING MY ABILITY TO SEE OTHER CARS IN MIRROR. ITS AS IF THEY ARE DRIVING WITH THEIR HIGH BEAMS ON & THEY ARE AIMED TOO HIGH AT SAME TIME.

ALONG THOSE SAME LINES SOMEONE SHOULD REQUIRE A UNIFORM HEADLIGHT HEIGHT. VANS & SUV'S BLIND ME AFTER DARK BECAUSE THER HEADLAMPS ARE CONSIDERABLY HIGHER THAN MY REAR DECK HEIGHT.
