Dear Docket: OST-99-6578-30

I suggest that you change the FMCSA modal requirement of a one-year retention of negative test results to two years.

If an Agent comes in to check drugtesting compliance in Nov or Dec, + asks the carrier to prepare an Annual Summary, the carrier would not be required to have most of the backup records that would corroborate the quarterly summaries. That makes no sense.

A two year record retention period is not unreasonable. Why not make that a Part 40 requirement across all modes?
