252691 FAA-02-13378-3792

Federal Aviation Administration
I have heard that certain proposed regulations fell short in some areas.
I believe that airlines should keep the temperature controlled and regulated to the animals that fly on that plane. Animals include research laboratories, animal exhibitions and zoo animals. All animals feel cold & warmth their little bodies have feelings, it makes me sad and it hurts me to know that those animals suffer. You care about humans well humans are animals too. Anyway I know a lot of people will be behind you if you pass this law. Also there should be training requirements by the airlines of their personnel and baggage handlers for safe and humane handling of the animals please do something so the animals don't suffer. How can you sleep at night knowing animals → might be freezing or dying of heat stroke

Thank-you for your time. Please make a change for them.

Thank You

Sincerely

Kimberly
