To whom it may concern, FAA-04-16944-5

293092 There should be flight reduction because there can only be a certain number of flights in confined space. The air-controllers are over-taxed I live on Runway 27L I just hope one these planes <u>won't</u> come down.

Maybe if we would have another airport Peotone we would'n all these problems. I can't understand why New York and Los Angeles have so many airports and Chicago only two. Maybe build another airport and take the strain off ~~airp~~ O'Hare Lets quit hossing around.

O'HARE EXPANSION will not solve ~~problem~~ problem just add more congestion. The only reason mayor Daley wants this is control over everything at airport. I have UAL stock I want to be paid off
