I am concerned with the "rider interview" study

I'm not convinced you will get an accurate representation of motorcycle riders with this survey

One of the larger MC events is in Sturgis South Dakota, I don't see this on the list of States being considered. Only 4,000 respondents/yr indicates to me a small group of interviewers. There is a large group of riders that do not belong to 8 Motorcycle clubs/groups

The need more ① available Rider Education and Experienced rider education classes to teach us to ride better.

② Drug & alcohol legislation ③

If this does get approved - where can I apply to be an interviewer?
