NHTSA-03-16128-43

12.16.03

Dear Dr. Runge,

I strongly urge NHTSA to adapt stronger SUV national fuel economy standards (surpass the 27.5 mpg standard) + safety (via Union of Concerned Scientists + Center for Auto Safety blueprint) for just $750 ↑ cost (which would be paid back by more mpg)! Walk your talk! Americans want safety, cleaner environment and large actions to stop global warming!

Your attention to this most urgent matter would be much appreciated by all future generations of all species.

Thank you,

Lydia Garvey
