

I would like to see more attention paid to forms of transportation that are not private automobiles. Although the automobile industry adds a lot of money to our economy, it is destroying us in many other ways. The overall costs of private automobiles; health, environment, safety, social dysfunction, are too great to continue to ignore. We need a new model for how to get people from place to place, other than one little person per automobile. Please increase spending for public transportation, and bike and pedestrian accessibility.
