Publication Information

Clearly identify the report, data set, or other document that contains the information you want the Department to correct.

DOT Agency: BTS
Publication/Report Title: Safe Stat
Publication/Report Title: 06/12/01

How did you receive the information? If found on a website, please indicate the URL

Found under US DOT A&I on line www.ai.volpe.dot.gov

Describe how the information in question affects you (i.e., how an alleged error harms you, and/or how the correction will benefit you).

This makes Dyno Nobel rating too high because it should be on Dyno Nobel Transportation Inc. DOT # 211986

Clearly identify the specific information that you believe needs correction. Under safe stat summary event #OH-2001-132-US0482 this is under Dyno Nobel DOT#004183 and should not have been charged here - the correction should be on Dyno Nobel Transportation Inc. DOT# 211986

Specify, in detail, why you believe the information fails to meet standards of integrity, utility, and objectivity.

It is charged to the wrong DOT #

Specify your recommendations for what corrections DOT should make to the information in question and reasons for believing that these recommended corrections would make the information consistent with both the DOT's and OMB's information quality guidelines.

This would make the numbers correct - as it stands now Dyno Nobel DOT #004183 is being charged for the dollar amount of \$1,200.00 when it should be for Dyno Nobel Transportation Inc.

In a case where the Department has not designated a report, data set, or document as being subject to these information quality guidelines, and you believe it should be, you should specify why the information should be subject to the guidelines; and include any documentary evidence you believe is relevant to your request (e.g., comparable data or research results on the same topic). A report has be set - check your A&I on Safe STAT www.ai.volpe.gov
