Publication Information

Clearly identify the report, data set, or other document that contains the information you want the Department to correct.

DOT Agency: BTS

Publication/Report Title: Accident at 112th St. and 137th Ave.

Publication/Report Title: May/2000

How did you receive the information? If found on a website, please indicate the URL

Auto Insurance pulled a report on me and wants to increase my premium. Describe how the information in question affects you (i.e., how an alleged error harms you, and/or how the correction will benefit you).
My Auto Insurance Co. found a report about that accident on May/2000 when being parked at a median somebody rearended my Company vehicle. I called the police, my supervisor and the person in the other vehicle accepted guilt. Teh police officer wrote a report and that was all.

Clearly identify the specific information that you believe needs correction. The report of me being ON A ACCIDENT should not be on record so Insurance companies will increate premiums on those records. I was told by the manager at my job that the information about that accident should not be on my record.

Specify, in detail, why you believe the information fails to meet standards of integrity, utility, and objectivity.

I understand that records are important for all of us but when you do nothing wrong and there is no contest on a accident, no litigation, no arguments, then why ruin sombodys REALLY GOOD RECORD plus give Insurance Co. a chance to increase their profits. THAT IS NOT RIGHT.

Specify your recommendations for what corrections DOT should make to the information in question and reasons for believing that these recommended corrections would make the information consistent with both the DOT's and OMB's information quality guidelines.

The information concerning Armando Navarro being on a ACCIDENT on May/2000 should NOT be on records available to Insurance Co. or any other institution.
1)My vehicle was parked (NOT IN MOTION) 2)It was my Bellsouth vehicle, not my personal vehicle, so for any porpose the record should be on Bellsouth's records.

In a case where the Department has not designated a report, data set, or document as being subject to these information quality guidelines, and you

believe it should be, you should specify why the information should be subject to the guidelines; and include any documentary evidence you believe is relevant to your request (e.g., comparable data or research results on the same topic). Have no documents, but I'm willing to clear my record the right way.
