

42029

Docket No. 984124

Attn: NHTSA - 98-4124-52

I would like to file a complaint against the daytime running lights common known as (DRL). They make it more difficult to see motorcycles during the day. They also do not offer any additional safety for cars. They also distract manufacturers from developing real safety equipment for cars. This is because they are trying to stay competitive with those manufacturers who do offer this option.

Cordially,

Owen Buckvar
