I would like to express to you my fears concerning the CAPS system and the future of my country. While I do not support acts of terrorism, I also will not permit invasive searches and profiling measures to become standard in airplane reservationing. Even more scary than a bomb exploding on the plane that I am on is the control that the Federal Government will have over my private information. There has been a long history of the US Government inappropriately judging what is "suspicious". Without safety valves such as an independent advisory panel and a cut-off date, this has the potential to be the largest, most recent invasion of privacy of the American people by its own government.

I am the voice of the people, the voice of the public, the voice of the true government. Take down CAPS profiling system. It causes more harm and more cost than it could ever possibly help. IT IS NOT WORTH THE COST OF "PROTECTION" AGAINST "TERRORISTS". Please act wisely...
