Dear sirs,

Not all Americans are willing to goose-step into the future. The fact remains that various military forces are responsible for some of the most heinous terrorist acts on air travelers. The Soviets shot down KAL007, the U.S. Navy shot down an Iranian airliner, the Israelis shot down a Libyan airliner. All three of these criminal acts went unpunished and the various governments lied about their actions to minimize public outcry. It becomes obvious that the lives of innocent people are not what this law is about, it is an Orwellian law. I will never fly on a commercial airliner again since its equally obvious that if the airline industry didn't want to contribute to Fascism they could just sqwauk a little like every other special interest group with deep pockets and the process wouldn't have gotten as far as it has.

Sincerely opposed to The Police State,
Randall Williamson
