Priority: Normal  
Subject: Docket No. FAA-I 999-5836; Notice No.99-09

1999 JUN 24 P 3: 09

Greetings,

We have just obtained the subject NPRM issued June 19, 1999, and are distressed that we have such a short time review and provide comment to such a wide-ranging rule making. FAA has been working to produce the revised Part 145 since 1975. It seems inappropriate that the affected Repair Stations have only 120 days to review a document that will so profoundly affect the nature of their business and livelihood.

Please accept this as an official comment which requests extension of the comments deadline for the subject notice to December 19, 1999.

Respectfully,

Fred Zimbelman  
Soundair Repair Group  
Woodinville, WA  
FAA Repair Station No. S2DR551J
