

I am objecting to night flights. They must be abolished! I live close to Hanscom Field and just in the month of July there were 39 flights which my wife and I counted between 11 PM & 7 AM, some extremely loud, i.e. on 7:22 at 2:03 AM an L523 jet flew over so close & so loud that I fell out of my bed. This is in complete disregard of our rights as citizens not to be terrorized during sleeping at nights by airplanes. Nighttime flights must be banned. A curfew must be instituted between 10 PM and 7 AM except for emergencies. And obviously the FAA must be downsized to just regulating passenger & aircraft safety. The environmental impact must be regulated by the EPA. Local communities must have a say of the expansion of airports and air traffic in conjunction with the EPA. The FAA has to be out !
