

PLanes should not be allowed below 500 ft over Residential Areas. In my area which is over a mile from the Airport Planes seldom are above 250 ft. I'm sure they are only sightseeing. Also, Sightseeing Planes and Helicopters should be at least 500 ft high. I have complained to Truckee Airport Management numerous times about both of the above and they tell me nothing can be done. Please change the Noise Abatement Ruling. Thank You.
