

I am in favor of the change to central time. I work on both times, as does most of the county. Williston, 200 mi west of us, is on CT. the use of the river as a boundary is antiquated, and not followed for the most part. We share e911 services with Oliver county, which is on central time. It uses up two hours in the middle of the day, one when ct is on lunch, and then when we on MT are on lunch break.
