

I strongly support the changing of the time zone in Mercer County from Mountain Time to Central Time. I am a teacher and also a parent of high school students who participate in extra-curricular athletics. I am concerned about the amount of time our students miss from class when leaving early for games etc. My husband is also a local business man and has been hindered by being on Mountain Time when his main office in Fargo is on Central Time. Many transactions within his business end up being delayed due the difference in time. I think the change to Central Time would be extremely beneficial to our local businesses as well as our school system.
