Recommend FAR Section 91.145(d) is modified to add:

- (1) Air traffic control; or
- (2) A Flight Standards Certificate of Waiver or Authorization issued for the demonstration or event;
or
- (3) *Receive an authorization from the official in charge of the demonstration or event.*

Adding (3) would allow flexibility and control for the organization responsible for the demonstration or event. Not all events have an air traffic control element. The news media would not require a certificate or waiver since it would not be a participant.
