## **Aerospace Industries Association Comments: Regarding FAA Notice of Proposed Rulemaking 00-17**

Reference: **Docket No. FAA-2000-8511; Notice No. 00-17**

The undersigned has completed an AIA activity to review and comment on the subject Notice of Proposed Rulemaking. This Notice deals with FAR/JAR Harmonization Actions, and in particular "Revisions to Requirements Concerning Airplane Operating Limitations and the Content of Airplane Flight Manuals for Transport Category Airplanes".

The NPRM was found to closely follow recommendations that were developed by the ARAC Flight Test Harmonization Working Group (FTHWG). These recommendations were approved for transmittal to the FAA by the ARAC Transport Airplane and Engine Issues Group (TAEIG). The original recommendations were agreed to by AIA members of both the FTHWG and TAEIG.

All comments received during the course of this review were favorable to the NPRM as published.
