Re. Docket No. FAA-2001-8690 - 30

Dear Director Fazio:

Let me first say that I support the 5000 feet altitude Above Ground Level for planes over our National Parks.

Regarding the docket referred to above: I also support beginning of the immediate enforcement of the "no new entrants" Clause of the Act that sets forth the law.

Additionally, all existing air tour operators should be blocked from flying over parks if they ignored the FAA Advisory which requested air tour operators to notify the FAA of their over-park operations within 90 days of the passage of the Act.

Your attention to these matters will be appreciated.

Yours for protecting our National Parks,

  
Merrill K. Johnson
