

I AM RELIEVED THAT SOMEONE IS ADDRESSING THE GLARE BY THE HIGH INTENSITY VEHICLE HEADLIGHTS THAT HAVE COME INTO USE RECENTLY. THESE LIGHTS ARE PARTICULARLY DANGEROUS ON SUVs BECAUSE THEY ARE MOUNTED HIGHER AND USUALLY STRIKE THE MIRROR OF A SMALLER VEHICLE DIRECTLY. I DRIVE A COMPACT CAR. I ALSO SUFFER ALLERGY MIGRAINES OCCASIONALLY, AND WHEN I ENCOUNTER SUCH A GLARE WHEN I HAVE A MIGRAINE, IT IS EXTREMELY EXCRUTIATING AND DISTRACTING. MY GUESS IS THAT A PERSON WHO HAS AN EPILEPTIC CONDITION, DIAGNOSED OR UNDIAGNOSED, COULD ACTUALLY BE BROUGHT INTO A SEIZURE BY SUCH "OVERKILL" HEADLIGHT REFLECTION. FINALLY, IN MY AREA OF VA. THERE IS MUCH WILDLIFE, PARTICULARLY DEER, THAT STANDS TO BE ENDANGERED ON THE ROADS SINCE SUCH LIGHTS WOULD BLIND THEM TO THE DEGREE THEY WOULD HAVE A PARTICULARLY HARD TIME GETTING SAFELY OUT OF THE WAY OF ONCOMING TRAFFIC. PLEASE DO SOMETHING ABOUT THESE HEADLIGHT BULLIES! THANK YOU MUCH.
