

As a licensed Aircraft Dispatcher, a member of the Airline Dispatchers Federation and a Dispatcher for American Airlines Inc., I urge the Administration to require positive operational control by a dispatch system, for Fractional Operators. Especially in light of recent disasters, the requirement for additional safety measures associated with joint responsibility is imperative for the highest percentage possible of all aircraft operators. Together with all applicable operators, help us to keep the "Single Level of Safety," a level that is not only high, but also continuing to strive for new heights in the pursuance of safety.

Regards, Michael J. Hentz
