

The hole in the safety net by the absence of collision avoidance systems in ALL large aircraft (let alone ANY aircraft) is too big to ignore!

I have had an opportunity to read and study the above NPRM, and I fully support your position and feel strongly in favor of the proposed rule.

As a member of the aviation community and a member of traveling public as well as a member of the general population I feel that this rule will enhance aviation safety for us all.

Sincerely,

Joel Freeman
