

On This past Wed. June 26th. I was traveling on Rt. 322 in Pa. I was caught up in a traffic jam which happened on Interstate 80 between the Woodland exit and the Clearfield Exit. A tractor trailer and a car wrecked and the tractor trailer had hazardous chemicals which was spilled. Interstate 80 was shut down for approx. 10 hours. MY QUESTION IS, WHAT WOULD HAVE HAPPENED IF THAT WAS NUCLEAR WASTE DESTINED FOR YUCCA MOUNTAIN IN NV?? After being involved in that traffic jam for 4 hrs. I am strictly against the moving of any nuclear waste on our nations highways. It would be suicide to do so. This is my position and I would like to voice it to those who may be somewhat concerned. Thank you for your time.
