

This Is a plea from the Nations Refrigerated Truck Drivers. As you probably are aware the Majority of grocery warehouses require the driver to "Break Down" a load to fit their shelving requirements, This was prohibited by the Innerstate Commerce Comission and is a very Dangerous Practice as it requires a Driver to Exhaust himself or herself and then Get back in the truck and drive. Plus the Driver usually recieves no compensation for this extra work ! Would you do someone elses work and not be expected to be compensated ? I Think Not !. Please give the Nations Drivers a Helping hand by passing regulations against this practice !
