

We are responding to the U.S. Dept. of Transportation request to remove Farm Plated Vehicles from safety inspections.

We do not want this to happen! First of all, our truck are rarely on a state highway. We travel on backroads and places around the farm. We live in a very rural area. The farm economy is very poor and it would be very costly to get our trucks to meet state requirements. Please leave the poor farmer alone.  
Thank You for your time
