Re: NPRM Docket No. FAA-1998-4521 - 1488

Sirs,

As a small Part 91 sightseeing operator I wish to express my opposition to the proposed legislation contained in this NPRM. There is no reason to impose the restrictions, which would make our business impossible to continue. The safety issues are non-existent for the kind of flying we do. Statistics do not support the burden this would place on us. The only reason I can conjure for this legislation is the governments desire to control small business to the point of extinction. Please do not consider this proposed legislation.

Regards,

John Pike
