

We've been a home owner just East and South of the Santa Monica Airport. When we purchased in 1976 NO JETS were allowed! Since then the pilots have gotten their way and now control our skies and make breathing difficult and black film sits on plants and furniture. As citizens and home owners we are being denied our constitutional right to have quiet enjoyment of our home. We were not consulted before these Jets started taking off and landing at the airport! Why are our rights being ignored? How do we get listened to?
