

It is an outrage and an insult to not have public dialogue and input before you make a ruling on noise limits, weight limits, etc. at the local airports, specifically, the Santa Monica small aircraft airport. I, my family, and neighbors are impacted by the lack of regulation at this airport. At 11pm some nights a jet landing sounds like my roof is going to come off. And I'm not even talking about the pollution being dropped on us. I moved into this neighborhood in 1983 because of the peacefulness of the area. It is now congested like a freeway on Lincoln Bl. and overhead by corporate jets. If I had wanted to live on a runway I would have bought a house in Westchester.
