

RE: FAA Docket Number FAA-2003-16526

Stage IV Aircraft Noise Standards

I live near a general aviation airport, and I am in favor of stricter Noise Standards for ALL aircraft (including those under 75,000lbs) and a phase-out of noisier older aircraft. BEFORE the FAA goes to ICAO to set future Stage V Standards, it is urgent that Public Comment be solicited so that the needs of US citizens are represented.
