

§ 659.07 Withholding of funds for noncompliance

The proposed rule appears to better serve the state with regard to providing authority to issue specific requirements for implementation and compliance with the oversight agency's standard. However, the rule should emphasize and reinforce the state oversight agency's jurisdiction and authority to enforce and render judgment, interpretations and final decisions for its oversight responsibilities and activities. Further, the rule should provide clarification on the methods or processes by which the state may initiate the withholding of funds for an agency's non-compliance.
