Publication Information

Clearly identify the report, data set, or other document that contains the information you want the Department to correct.

DOT Agency: BTS

Publication/Report Title: I don't know where the report, data set or other document is located

Publication/Report Title: 00/00/0000

How did you receive the information? If found on a website, please indicate the URL

I am looking for information -- I have not received information

Describe how the information in question affects you (i.e., how an alleged error harms you, and/or how the correction will benefit you).

There is a pond in front of 112-06 176th Street every time we have a heavy rain and sometimes it extends as far as 111-54 176th Street. I am considering purchasing 111-54 176th Street and I wanted to know if there is some way the street can be graded to prevent a pond in front of the home I am considering purchasing?

Clearly identify the specific information that you believe needs correction.

I believe that grading the street to level it in addition to installing a catch basin may alleviate the pond forming in front of these two homes.

Specify, in detail, why you believe the information fails to meet standards of integrity, utility, and objectivity.

I know the DOT is aware of the ponding problem in some areas in Southeast Queens but I was requesting information as to when and if the problem will be corrected at a specific location

Specify your recommendations for what corrections DOT should make to the information in question and reasons for believing that these recommended corrections would make the information consistent with both the DOT's and OMB's information quality guidelines.

I know the DOT is aware of the ponding problem in some areas in Southeast Queens but I was requesting information as to when and if the problem will be corrected at a specific location

In a case where the Department has not designated a report, data set, or document as being subject to these information quality guidelines, and you believe it should be, you should specify why the information should be subject

to the guidelines; and include any documentary evidence you believe is relevant to your request (e.g., comparable data or research results on the same topic). I know the DOT is aware of the ponding problem in some areas in Southeast Queens but I was requesting information as to when and if the problem will be corrected at a specific location.
