

Please consider the Imogen One portable concentrator for COPD users in this bill. We on oxygen need some relief when flying on airplanes. Also consider that we would be able to plug the concentrators into your electrical outlets like the computer users do. We would have some battery back up but not enough for the duration of the whole trip. On a trip across county that would require 5 or more very heavy batteries. Please do this as soon as possible. We would really like to be able to fly with some convience. Thank you, Frances Bowman
