Draft
Drawings and specifications defining the ES-2re 50th percentile adult male side impact crash test dummy are being submitted to the Docket. The drawings are needed to support an NPRM to amend 49 CFR Part 572 by adding specifications and qualification requirements for a new mid-size adult male crash test dummy. This test dummy would be used in the proposed upgrade to FMVSS No. 214.

Draft
Due to the large size of the package, the drawings are being submitted directly to the Docket through the electronic submission system.

Note:
The drawings submitted/filed on 8/6/04 are drafts and could be corrected or otherwise revised in the course of the Part 572 rulemaking.
