

All legal alliens in the US have been fingerprinted and their background cheked by the FBI. Our Allien Registration card should be used the same form documents for US citizens are used to demonstrate that we are legal and able to live our lives with all the freedoms as other tax paying citizens. Taxes paid by legal alliens help fund the Department of transporation. Besides all existing foreign pilots currently licensed in the US would have to go extensive paperwork just to do a check ride. Public hearing should be held to prevent a costly bureacracy to govern GA flying. The freedom of flighth in the US should be preserved, but at the same time, a watchfull eye should be in place to prevent any terrorist acts. Nonetheless, creating rules and laws without input from the people which are being affected is not a good idea, as future changes, (which will eventually happen) will cost all tax payers more money.
