

Under this new rule. A school or instructor would not be able to provide an introductory flight lesson without the prospective student getting fingerprinted and pay the fee(s). This will essentially eliminate 1/3 of my new student from ever even starting training and create a heavy paperwork burden documenting the US citizens that take intro flights. The rule needs to be amended to allow a school or instructor to give a single flight lesson to an individual regardless of citizenship without having to comply with the provisions of the rule.
