

It has been often that Gannett Co. , Inc. has used Chicago O'Hare Airport for Part 91 operations. We have dropped off/picked up passengers connecting to/from airline flights as well as participated in meetings in the close proximity to O'Hare Airport. We are opposed to the proposed implementation of required slots for unscheduled flights. We feel this program unfairly favors the scheduled 121 operators. We believe this program hand-cuffs the business community into using other airports that are not convenient to the business demands of our passengers. We sincerely request that this program does not go into affect.

Sincerely,
Dean F. Snell / Gannett Flight Operations
