

As the Right of Way Supervisor in this part of Kentucky for the last eleven years, I can state without reservation that the MAR system has been the most beneficial tool I have seen for enhancing the overall right of way process. This tool allows for a more efficient acquisition process for clearing a project while providing the property owners a fair and timely resolution of the purchasing process.

The general public benefits from a process that: (a) saves them money in terms of appraisal costs removed (b) improves an often cumbersome preconstruction process (c) provides a fair and prompt acquisition offer and (d) expedites a much needed public project.

There is no down side to this process and I hope it remains. In Kentucky, we have a \$10,000 cap on our MARs parcels which I would like to see raised to at least \$20,000. Thank you for your attention to this comment.
